Connect to StaffBYOD

- 1. Tap on the Settings icon
- 2. Select Connections
- 3. Select Wifi
- 4. Select StaffBYOD

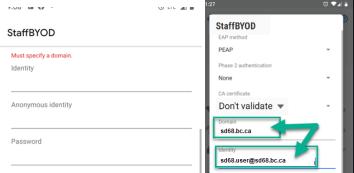

- 5. Accept defaults for Phase 2 authentication and CA certificate. If prompted to select EAP method it is PEAP but usually you just accept the defaults.
- 6. Some of the newer phones you have to select "No certificate specified..." or don't validate. You may be prompted with "Your connection won't be private" but that is because we are using our own certificates.

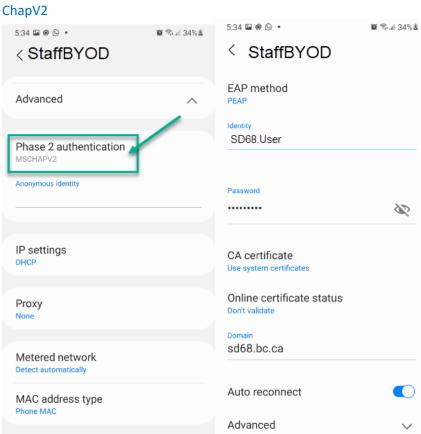

7. Enter your username in Identity

8. If you have Android 11 or later and are prompted to enter a domain, enter sd68.bc.ca. If there are any issues with your username for identity, enter your email address.

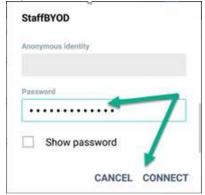

With Android 11 or later, If you don't have Phase 2 authentication None as an option, select MS ChapV2

9. Scroll down and enter your Password

Connect
