

Desmos

Desmos provides flexible and gamified ways to learn mathematics while allowing students multiple ways to show their understanding. Can be used synchronously or asynchronously to let students work at their own pace.

Summary of the Privacy Assessment

Data Collected

- Student email address and password OR link to Google Account, first and last name, class assessment data, and other classroom content. (Data collected depends on how the product is used)

Personal Information is used for or shared with...

- Data used to evaluate, improve, and develop our products, applications, and services
- Data is NOT used for marketing purposes or to engage in targeted advertising
- Aggregate or anonymized data may be shared with third parties, but will do so only in such a way that no individual may reasonably be identified.

Security

- Access to user information is limited through user/password credentials and, in some cases, two factor authentication to only those employees who require it to perform their job functions.

Data storage location

- Stored in the United States

Data review/retention

- Desmos will not knowingly retain Student Data beyond the time period required to support the school's purpose, unless authorized by the parent/student.
- Desmos will delete or de-identify Student Data at the direction or request of the school.
