

CELL PHONE - ANDROID WIFI INSTRUCTIONS

Connect to StaffBYOD

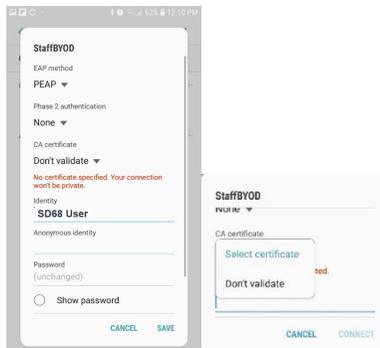

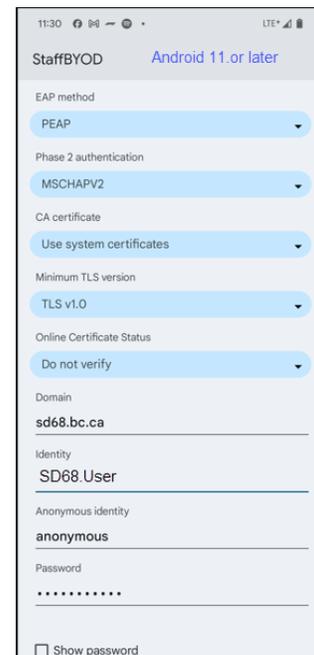

1. Tap on the **Settings** icon
2. Select **Connections**
3. Select **Wifi**
4. Select **StaffBYOD**

5. a. With **Android 11 or later**:

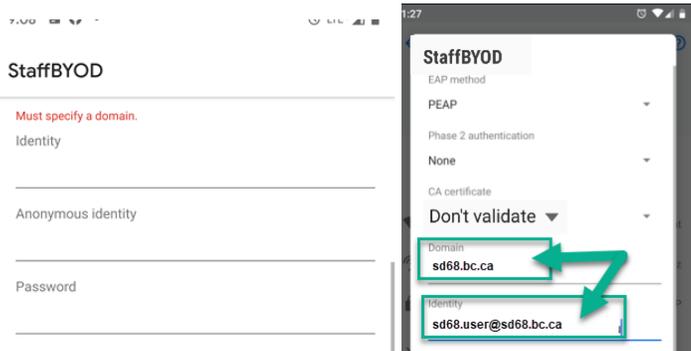

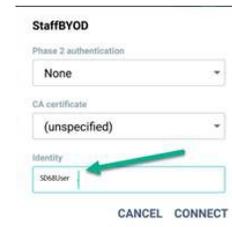

EAP Method is **PEAP**
Phase 2 Authentication **MSChapV2**
CA certificate – **Use system certificates**
Minimum TLS version **TLS v1.0**
Online Certificate Status – **Do not verify**
Domain is **sd68.bc.ca**
Identity – **your username**
Password: **your SD68 password**

- b. With older Android phones
Accept defaults for **Phase 2 authentication** and **CA certificate**. If prompted to select EAP method it is **PEAP** but usually you just accept the **defaults**.

- c. Some of the newer phones you must select **“No certificate specified...”** or **don't validate**. You may be prompted with **“Your connection won't be private”** but that is because we are using our own certificates.

6. Enter your username in **Identity**
7. If you have **Android 11** or later and are prompted to enter a domain, enter **sd68.bc.ca**.
If there are any issues with your **username** for identity, enter your **email address**.

8. Scroll down and enter your **SD68 Password**
9. Tap **Connect**

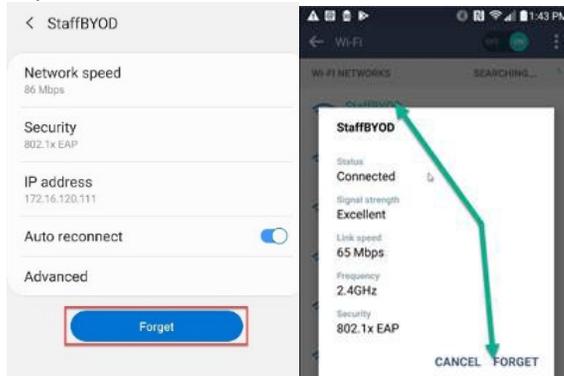

Forget the StaffBYOD network

If you are connected and having problems or you have changed your SD68 password select **Forget** the StaffBYOD network and follow the steps to connect to it again.

1. Tap on the **Settings** icon
2. Select **Connections**
3. Select **Wifi**
4. Select **StaffBYOD**

5. Tap on **FORGET**

6. Follow the instructions to **Connect to StaffBYOD** again.
